c) perhaps it will not be as difficult as she fears
d) she was pleasantly surprised at what a rewarding experience it turned out to be
e) it will probably be difficult for her initially

F. 36. – 38. soruları aşağıdaki parça göre cevaplayınız.

Around 8000 B.C., agriculture was developed. People had never before eaten so well, and a population increase followed. But this also meant that people had to give up their free, nomadic life, and remain tied to a single place. It also meant hard labour. Nomadism did not disappear, of course. Those who retained the old wandering way of life continued to regard themselves as freer and more noble than settled peoples, whom they would often raid. These divisions and conflicts between nomad and settled farmer continue in many parts of Africa and Asia right up to the end of the 20th century.

36- The passage states that one result of the development of agriculture was that ...... .
A) people didn't have to work as hard as they used to
B) people began to make inventions
C) there was an improvement in people's diet
D) nomadism gradually disappeared
E) people became less savage

37- It is clear from the passage that farming ...... .
A) was invented after long periods of hard work
B) was regarded as too difficult by nomads
C) was best carried out by the people in Asia and Africa
D) also helped develop people's way of thinking
E) prevented people from living as freely as before

38- From the information given in the passage, one can conclude that, in Africa and Asia ...... .
A) the nomadic way of life has gained in popularity in the 20th century
B) agriculture started earlier than in other continents
C) nomadism, which disappeared in ancient times, has been revived in modern times
D) there are still people leading a nomadic way of life  
E) nomads can find more to eat than settled farmers

**G. 39. – 41. soruları aşağıdaki parçaya göre cevaplayınız.**

Vitamin C occurs most abundantly in oranges, lemons, grapefruit, and raw tomatoes and cabbage. Several other fruits and vegetables, including potatoes, contain lesser amounts. It is, however, easily destroyed by cooking. Vitamin C is necessary for the development of bones, teeth, blood vessels, and other tissues, and plays a part in the functioning of most of the cells in the body. Deficiency shows itself in painful haemorrhages around the bones and in swollen, bleeding gums, a condition called scurvy. For a long time, in the days when a sailor’s diet consisted of salted and dried food and ship’s biscuits, scurvy was the curse of sailors on long voyages.

39- It is obvious from the passage that vitamin C ........ .
A) is an essential part of a healthy diet  
B) is present in both raw and well-cooked vegetables  
C) is less important for adults than it is for children  
D) was once more important than it is now  
E) is the best cure for a cold

40- The passage implies that scurvy among sailors was caused by ........ .
A) a lack of fresh fruit and vegetables  
B) cooking food for too long  
C) having to work under difficult conditions  
D) the fact that their journeys were too long  
E) their fondness for fish and biscuits

41- The best way to ensure having enough vitamin C in one’s diet is to ........ .
A) thoroughly cook all food to destroy harmful bacteria  
B) try to avoid diseases affecting bones and teeth  
C) make sure that it includes lightly cooked meat  
D) eat plenty of salads and citrus fruits  
E) include such items as salted and dried food

---

**H. 42. – 44. soruları aşağıdaki parçaya göre cevaplayınız.**

Contrary to common knowledge, the water, milk and meat of coconuts only begin the list of uses of this versatile tree. The outer husk of the ripe nuts contains fibres that, when separated, can be twisted into twine rope of amazing toughness. It is quite resistant to rot from dampness or sea water. Despite the advent of nails and screws, this rope continues to be widely used for binding together the timbers of houses and the parts of canoes, tools and the hike. Expert craftsmen can make sizeable ropes which, after use, become quite flexible. The inner shell of the ripe nut can be cut and carved into ladles, scrapers, combs and cups and will take a high polish. Furthermore, the sap of the coconut palm can be fermented to make a pleasant tasting wine, while the fresh sap can be used as food for babies.

42- According to the passage, twine rope ........ .
A) can be used for some of the same functions as nails  
B) is the best possible material for making small boats  
C) cannot be made into small ropes, but only big ones  
D) can easily be damaged if not protected from rain and sea water  
E) is sometimes used in the manufacture of polishes

43- We learn from the passage that, despite the many uses of the coconut, it is ........ .
A) better known among people as a source of food
44- It is clear from the passage that
A) baby food made from coconut palms contains a bit of alcohol
B) wine made from the coconut palm tastes surprisingly like baby food
C) the same part of the coconut palm is used to make wine and baby food
D) baby food made from the coconut palm has a great nutritive value
E) wine made from the coconut tree tastes better than other types

45. The main focus of the passage is ............ .
A) a history of painting as a type of expressive art form
B) an explanation of why the best artists prefer to use oil paint
C) an explanation of how various paints are manufactured
D) a brief list of some types of paint and a description of their features
E) an argument for the superiority of water colours in art

46- As is stated in the passage, one feature of oil paint is that ......... .
A) it takes a long time to dry, during which time it can be damaged
B) artists must use it on specially prepared surfaces, not on paper
C) it is generally much easier to clean up than water colours are
D) images produced with it can be changed if the paint hasn't dried yet
E) true artists prefer using it to the less artistic water colours

47- It can be inferred from the passage that gouache paints ......... .
A) are much more expensive than water colours
B) are not considered to be true water colours
C) produce longer lasting paintings than water colours
D) take longer to dry than water colours do
E) are used by more artists than water colours are

Each year, about 7,000 people in the United States are bitten by poisonous snakes. Fewer than a dozen of these persons die, but many are left with disability of a limb and scarring at the site of the bite. Persons at greatest risk are those who handle snakes for purposes of entertainment, religion or science. Outside the high risk group, hunters, farmers and fishermen are the most likely to be bitten. The best way to tell the difference between a poisonous and a nonpoisonous bite is to identify the snake. A nonpoisonous bite doesn't usually cause much pain or swelling, though the wound may bleed freely. When there is any doubt as to whether the snake is venomous, presume that the bite was poisonous and take precautions.
48- According to the passage, the people who have the highest chance of being bitten by a snake are those who .......
A) hunt animals for sport or who deal with farming
B) try to catch snakes and put them in captivity
C) are unable to distinguish between different snakes
D) work directly with snakes or worship using them
E) are very religious and don't think they'll be bitten

49- The passage informs us that in the USA........ .
A) fewer than twelve people die of snakebites annually, although many people are bitten
B) people who have been bitten by snakes get rid of its effects completely in the long term
C) only twelve percent of those who have been bitten by snakes lose their lives
D) farmers and fishermen are more likely to be bitten by snakes than entertainers using snakes
E) many people bitten by snakes are too afraid to revisit the place where it happened

50- The author suggests that if you have been bitten, and haven’t managed to identify the snake, .......... .
A) you shouldn’t panic but should wait to see whether the bitten area will swell or not
B) you should make the wound bleed in order to remove any poison
C) you can assume you’re not at risk if the bite doesn’t hurt a lot
D) it is doubtful that the snake that bit you was venomous
E) you should be treated as if the snake was poisonous
