Director: Müdür

Institution: Kurum

Environmental priority: Çevresel öncelik

Assessment: Değerlendirme

Management: Yönetim / planlama

Advisor: Danışman

Milestone: Eşik

Mediterranean region: Akdeniz bölgesi

Negotiation: Pazarlık, anlaşma

Global organization: Küresel kurum

Membership: Üye

Implement: Uygulama

Evaluate: Değerlendirme

Observation: Gözlem

EIONET: Environment Information and

Observation Network

Indicator: Gösterge

Pioneer: Öncü

Chemical: Kimyasal

Competitive: Yarışmacı

### European Environment Agency (EEA)

The EEA is an EU agency tasked with providing sound, independent information on the environment. It operates as major information source for those involved in developing, adopting, implementing and evaluating environmental policy, and also the general public.

EEA's mandate is to:

- help the EU and its member countries make informed decisions about improving the environment, integrating environmental considerations into economic policies and moving towards sustainability
- develop and coordinate Eionet, the network of national environmental bodies set up to help the agency.

EEA staff are primarily located at the organisation's headquarters in Copenhagen and include experts on environment and sustainable development, information management and communication.

But the agency also leads the Eionet European environment observation network, which involves over 300 institutions across Europe.

To do this, the agency closely cooperates with the designated national contact (or 'focal') points in participating countries, as well as other national bodies (environment agencies, ministries, etc.) responsible for coordinating Eionet activities on their territory.
